

# *Stable Isotope Workshop at Aarhus University 29<sup>th</sup> of February 2012 (2<sup>nd</sup> Announcement)*

Dear colleagues,

Many scientists at AU work with stable isotopes, yet no official network exists for us to talk about our projects together. The goal of the workshop is to create a network for isotope scientists and to discuss the idea of a shared-use isotope facility for the Aarhus University.

The preliminary program:

- Short presentation of the area of research from each participant.
- Discussion forum.
- Tour of the Center for Geomicrobiology isotope facility.

The workshop will be held at the Center for Geomicrobiology on Aarhus University Campus in 29<sup>th</sup> February, 2012. We anticipate the workshop to last for one day. More details will follow, and lunch will be provided.

If you would like to participate in the workshop or want more information, please contact Kristine Maraldo on [Kristine.Maraldo@agrsci.dk](mailto:Kristine.Maraldo@agrsci.dk).

Hope to see you next year,

Workshop committee:

Laura Lapham, Center for Geomicrobiology

Nils Risgaard-Petersen, Center for Geomicrobiology

Hans Høy, Center for Geomicrobiology

Kristine Maraldo, Ins. of Agroecology
